

## TANIA HUYGHE'S FLORAL ART

Florist-designer Tania Huyghe has always wanted to create art using natural beauty, bringing happiness to people through the medium of flowers. Tania's work can be characterised as pure and as close to nature as you can get.

This dedication to celebrating the specialness of one's wedding day results in beautiful, tender and truly romantic arrangements.

Tania works to combine materials and techniques to produce works such as her floral hat (below), where Tania used the scoubidou technique. To create this hat, Tania experimented with various ways of using flat wicker - she calls this her favourite piece yet.

When creating autumn floral arrangements Tania prefers to stick to orange-red colors combined with nuts, malus apples, rose hips, chestnuts and pumpkins.

# PURE AND CLOSE TO NATURE

Tania especially enjoys working with branches and fragile flowers, such as poppies, sweet peas, aquilegia, cosmos and helleborus. Her preferred artistic techniques include tie, string and twine, for an ultra-natural effect. She also enjoys experimenting combining these techniques. Bridal bouquets are amongst Tania's favourite things to design. When creating a bridal bouquet, she makes sure that she always keeps in mind what she'd want to wear on her own wedding day.

Tania dreams big and one of the things she would love to do at this point in her career is to work for a while in a team of event planners and in the team of Tage Andersen and Gregor Lersch, taking the opportunity to have "a long talk with two pioneers in floristry." Tania wants to develop her career by working closely with the international florist family in order to learn from them and grow together. Good luck Tania - we can't wait to see what you do next!
